

# Download a copy of the database

You must have Microsoft Access version 2002 (XP) or later to use the database. Click on the link below to download a copy of the database, a zipped Access file. Many browsers can not open Access files directly. The screens can look very different in different browsers.

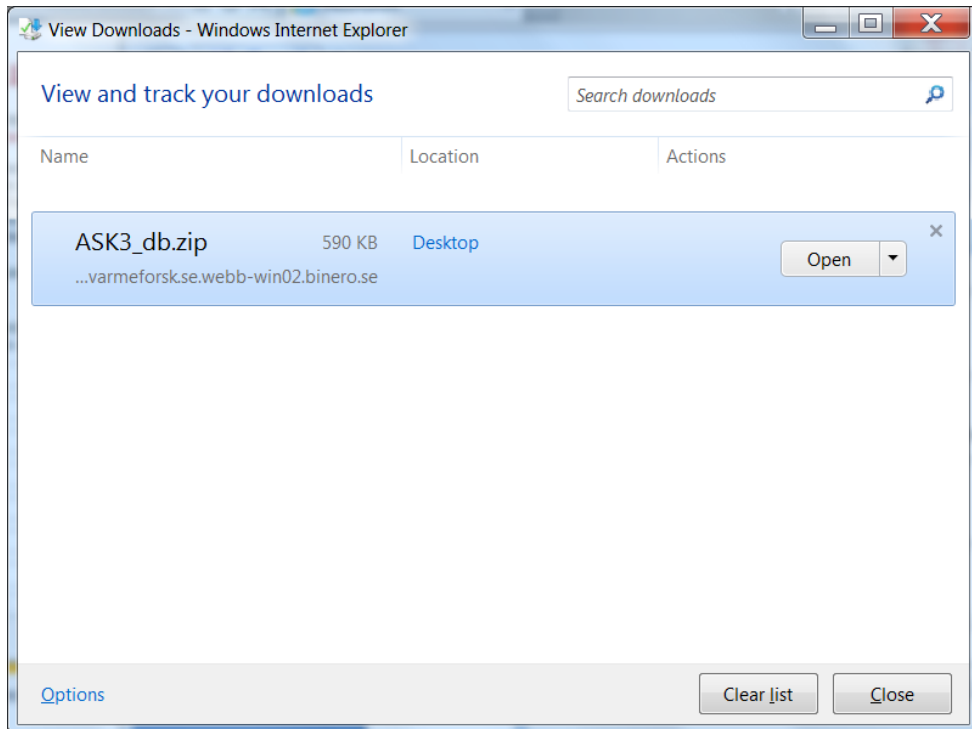

[Download database >>](#)

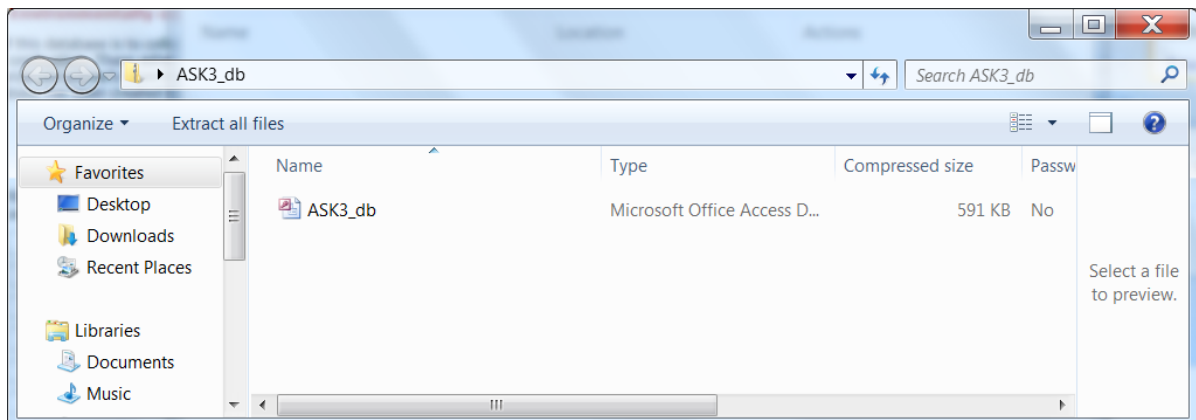

Choose Save as.

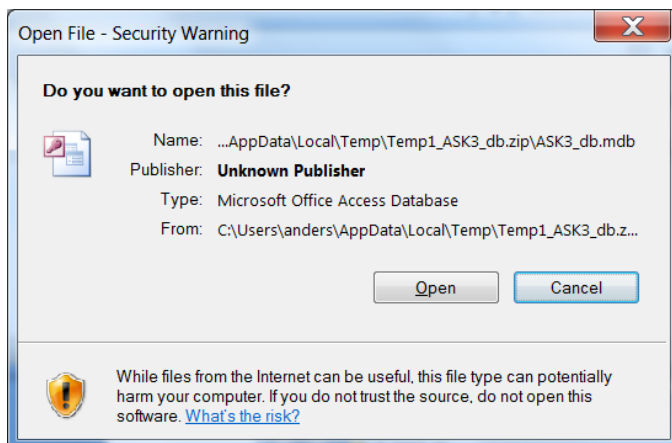

Try to choose to save to your desktop.

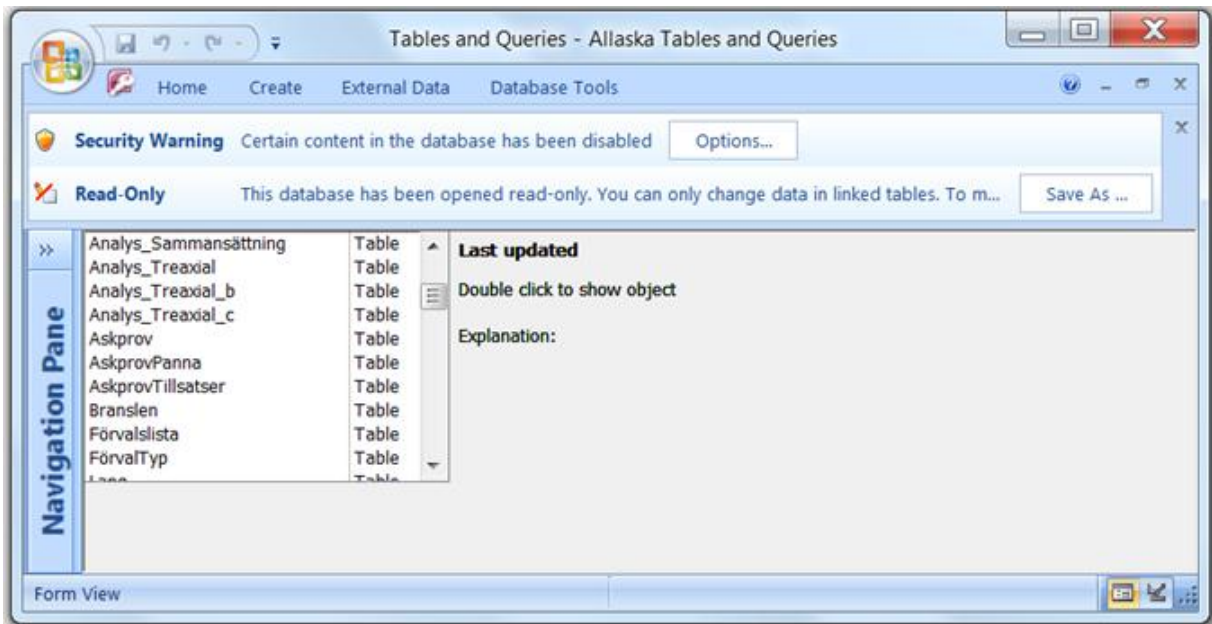

Open the zip file.

Double-click the Access file to open it.

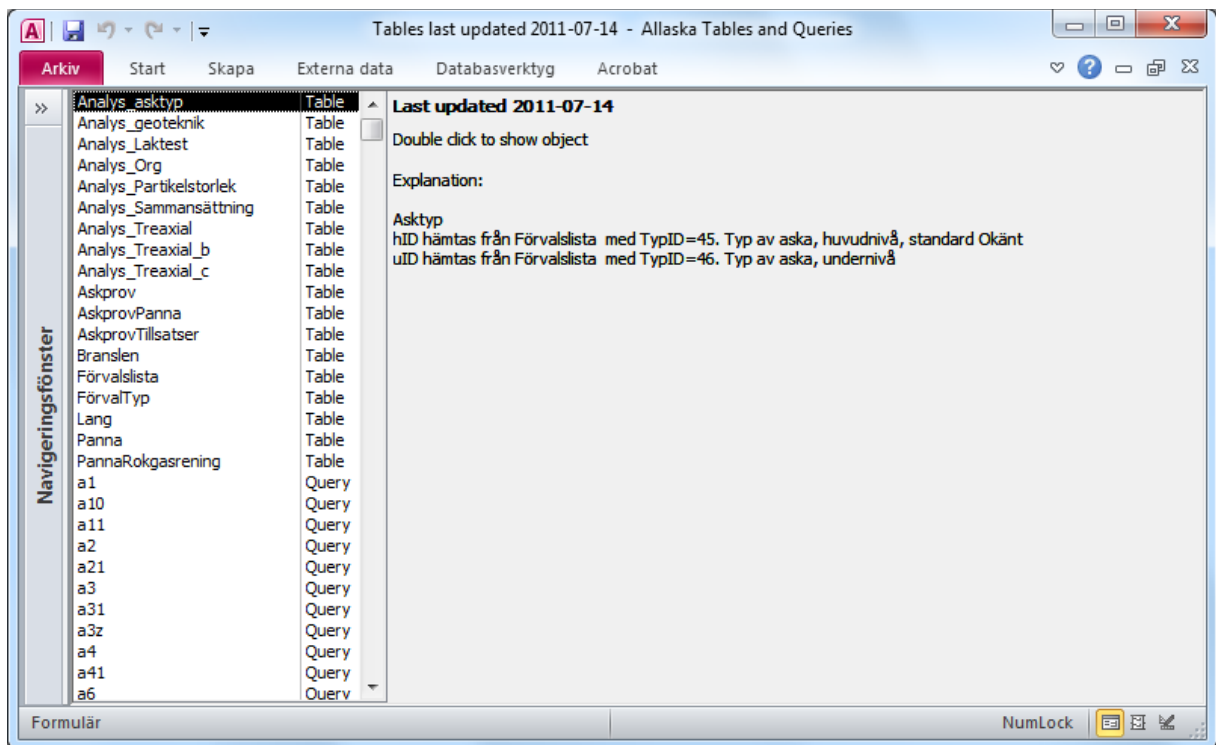

Accept Open.

Hide the left table list with click on <<.

If the above warnings appears, click on both buttons **Options...** (Activate content) and **Save as**.

In the next dialog, accept to close all open objects.

When you open the Access file, it starts with a list of all tables and queries.

When you select an item in the list, an explanation is shown.

Double-click the object (table or query) to open it.
